

EUCALL User Communication

Graham Appleby, European XFEL Facility
18.01.2017

EUCALL established a user communication platform based on the recommendations of Work Package 3 (Synergy of Laser Light Sources) members, the Synergy Board and approved by the Steering Committee.

A website was developed which contains links and subscription information to the newsletter of each consortium member, the events organised by each member and all of the social media accounts of the members.

The user communication platform can be found at www.eucall.eu/outreach.
